(STATE SIZE)

The Perma-Type Karaya Gum Washer is a formulation of Karaya Gum Powder combined with other ingredients to form a semi-solid compound which when used as directed is extremely effective in protecting the skin area around the stoma.

"Leakage", caused by a mis-fitted or improperly applied appliance, usually causes skin blisters, excoriation of the skin and/or "burns". The healing agents in PERMA-TYPE KARAYA GUM WASHERS are highly effective in alleviating and healing this condition.

A great many hospitals throughout the country are using PERMA-TYPE KARAYA GUM WASHERS daily with excellent results. Physicians and Surgeons are now recommending KARAYA GUM WASHERS for complete protection of the skin around the stoma. Since "one ounce of prevention is worth more than one pound of cure" we strongly recommend that KARAYA GUM WASHERS be used by all, at all times.

When ordering PERMA-TYPE KARAYA GUM WASHERS we suggest that you order a size 1/16" to 1/8" smaller than the size of the stoma. The KARAYA GUM WASHER is pliable and may easily be stretched to fit the stoma. It is very important that the KARAYA GUM WASHER lightly touches the stoma all around. The KARAYA GUM WASHER will not harm the stoma as it softens while it is being worn.

PERMA-TYPE KARAYA GUM WASHERS are made in individual plastic circlettes to insure both quality and easy removal. Available with the following size openings: 1/2" 5/8" 3/4" 7/8" 1" 1-1/8" 1-1/4" 1-3/8".

Outside diameter approximately 2-1/4" — packaged 14 to the container.

PERMA-TYPE's LARGE KARAYA GUM WASHER (outside diameter 3-3/4") is also available in the above size openings — Packaged 6 to the container.

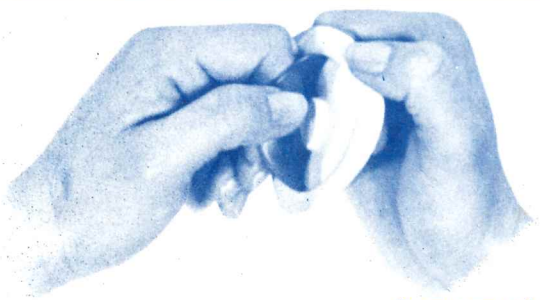

Figure 1

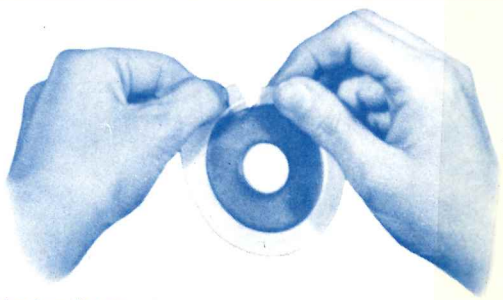

Figure 2

You may remove the Karaya Gum Washer from its container by bending the plastic circlette backward and peeling out the Washer (Figure 1) or by tearing the plastic circlette (Figure 2).
